CASE STUDY

# MANAGED SERVICES

GOVERNMENT OPERATION CENTER

## Business Objectives

The state of Qatar Government Network aim to provide stable, reliable and secure way of communication between all government entities, provide Internet services and enable Data exchange across all layers to support integration, online services and public e -service transformation plan for the state of Qatar Digital Government.

## malomatia's Role

malomatia is fully responsible to implement and manage the government network with all required IT Managed Services activities around the clock 365/7/24 to keep the platform service availability to the maximum, depending on media providers available in the market either QNBN or OOREDOO.

## Results Achieved

There almost close to 100 connected entities whom utilize the benefits of the government network and communicate with other as well as public users over the network; moreover there is a huge saving in the government connectivity cost because of the project direction to centralize connectivity and utilize the communication media as much as possible.
